MEMORANDUM FOR: Chief, Operations Group

FROM : Chief, FBIS Tel Aviv Bureau

SUBJECT : Annual Review of Non-staff Table of Organization

1. This review of Tel Aviv Bureau's nonstaff table of organization (T/O) recommends one tentative change for the coming year: The reduction of one telecommunications operator from the commo section, STAT with the reduction being transferred to the new system administrator position. This recommendation is premised on the likelihood that the STAT bureau will no longer need a commo T/O (the section chief, and following implementation of FBA-1 late in calendar year 1987. I intentionally use the word "tentative" above, because how FBA-1 will affect bureau staffing is still mostly an unknown at this writing.

2. Although the bureau has no named chief monitor, this review recommends that the T/O continue to retain this position for future bureau staffing flexibility within the overall FBN structure. It should be noted, however, that the bureau at this writing is recruiting two more Hebrew linguists, with one hopefully also with some Arabic capability. Based on prior Headquarters approvals, one of these Hebrew section monitors will actually occupy the slot, as it were, of the chief monitor.

3. The bureau's present and proposed T/O's follow:
